

# FortiGuard<sup>®</sup> Analysis & Management Services

Datasheet

## Hosted Central Management Solutions for FortiGate Systems

Centralized security reporting, logging and configuration management are critical components of a large enterprise's security best practices. To enable smaller organizations to benefit from these capabilities, which are typically priced out of reach of smaller organizations, Fortinet offers the FortiGuard Analysis Service and FortiGuard Management Service. By delivering the solutions via a hosted service model, businesses of all sizes using FortiGate<sup>®</sup> platforms can have a robust, fault tolerant security reporting, log management and centralized management solution. There are no additional requirements for hardware, software or facilities— providing a low cost of entry for smaller organizations.

### FortiGuard Analysis Service

- Security and device event logging
- Real-time event monitoring
- 40+ pre-configured graphical reports
- Flexible report delivery options

- **On-Demand Service** Securely access the service from any Internet connected web browser.
- **Reporting** Ability to instantly view your risk posture, network performance and availability of applications with an easy to use interface, reports are sent by email to the individual(s) you specify.
- **Log Management** Review logs real time or historically to assist with detailed understanding of FortiGate System Events, antivirus/IPS security events, spam activity, Web filtering issues as well as site-to-site and remote access VPN usage.
- **Content Archival** Track and analyze application and user activity, allowing for detailed understanding of your user environment and the applications being utilized within your infrastructure.
- **User Roles and Privileges** Easily control who has access to the service, what their privileges are and what alerting and reporting capabilities they are assigned.

### FortiGuard Management Service

- **Universal Access** Securely configure FortiGate devices from anywhere via the web-based interface.
- **Configuration Template Repository** Store configuration data for multiple FortiGate devices centrally for rapid deployment of new devices using similar policies.
- **Firmware Management** Maintain a central repository of FortiGate firmware images and update devices in real-time or on a scheduled basis.
- **FortiGuard Analysis Service Integration** Easily control both the FortiGuard Analysis Service and the FortiGuard Management service through a common web-based portal.
- **Multiple Roles for Administration** Easily control who has access to the service, what their privileges are, which devices they have access to.

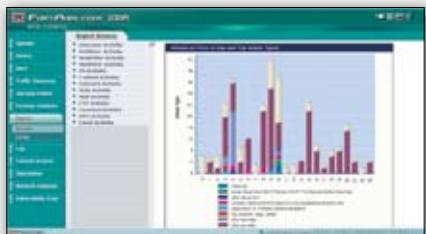

#	Date/Time	Administrator	Comments
5	2007-06-13 20:57	admin	Automatic Backup (Session expired)
4	2007-06-13 00:05	Admin	Automatic Backup (Session expired)
3	2007-06-11 22:06	root	Automatic Backup (Session expired)
2	2007-06-11 22:26	root	Automatic Backup (Session expired)
1	2007-06-11 19:49	Admin	Automatic Backup (Session expired)

- Archive FortiGate policies for additional device deployments or for rollback purposes
- Centrally manage firmware updates in real-time or via schedule
- Compare configuration policies and track policy changes to devices

## Rapidly Deployed FortiGuard Hosted Solutions

The FortiGuard Analysis service and the FortiGuard Management services are delivered in the same way as other FortiGuard Subscription Services. Both services are easily configured from the FortiGate device, authorized by the FortiGuard Center and in less than 10 minutes up and running. This allows for an on-demand approach to security log management, reporting, content archival, policy management and configuration management. Securely access the service from anywhere there is an Internet connection via your favorite web browser. Maintain visibility of your overall risk posture, receive detailed information for troubleshooting purposes and have assurance that your business is running securely and smoothly.
